Jaap Oudejans

SENIOR SOFTWARE ENGINEER

Profile

Passionate senior software developer who turned his hobby into his profession. With over 10+ years of experience in the JVM ecosystem, I have built, contributed to, and developed a wide range of projects across sectors such as payments, public transport, sustainability, and marketing.

Work experience

Software Engineer, Bol.com, Utrecht

JANUARY 2023— FEBRUARY 2025

Continued development of the marketing automation platform at Bol.com, focusing on the personalization of marketing emails and push notifications.

SKILLS: KOTLIN, JAVA, REACT, TYPESCRIPT, GCP

Software Engineer, CFP, Naarden

APRIL 2021 — JANUARY 2023

Developed and enhanced sustainability algorithms, BREEAM certification tools, VWS subsidy tools for energy coaches, and maintained existing infrastructure and software platforms for advising companies on sustainability measures.

SKILLS: KOTLIN, JAVA, ANGULAR, AZURE

Software Architect, Ximedes, Haarlem

AUGUST 2020 — MARCH 2021

Involved as an architect in setting up the payment facilitator platform for Loomis Pay. Primarily responsible for designing and developing the transaction processing system, including merchant payouts, reconciliation, accounting, invoicing, and more.

SKILLS: KOTLIN, JAVA, AWS

Software Engineer, Ximedes, Haarlem

JANUARY 2016 — AUGUST 2020

Developed a payment platform for Rabobank: OmniKassa. Started with the payment pages team and later strengthened the team responsible for transaction processing and related systems such as reconciliation, merchant payouts, and invoicing.

SKILLS: KOTLIN, JAVA, SPRING BOOT

Software Engineer, Ximedes, Haarlem

DECEMBER 2015 — DECEMBER 2015

Developed a library allowing Android phones to easily check in and out at gates via NFC.

Software Engineer, Ximedes, Haarlem

SEPTEMBER 2015 — DECEMBER 2015

Developed a proof of concept for automatic check-in and check-out in buses and trains using beacon technology. An Android app connected to multiple BLE beacons, automatically checking users in and out based on proximity.

Software Engineer, Ximedes, Haarlem
